

Data as of 12/31/23

WHY INVEST IN FTWO

Fuel: Energy prices may continue to rise due to strong demand coupled with supply constraints, and could potentially spike upon geopolitical shocks from Russia, China, and Iran.

Aerospace: Geopolitical risks may increase defense spending due to potential conflicts.

Agriculture: A growing middle class in emerging markets may drive record agricultural demand.

Nuclear: Energy shortages and climate concerns have the potential to rehabilitate nuclear energy's reputation across political divides, which may lead to deregulation amid safety and efficiency breakthroughs.

Gold: The classic inflation hedge may outperform in a decade of higher interest rates and sticky inflation.

FUND DESCRIPTION

FTWO is a passively managed exchange-traded fund (ETF) that consists of large- and mid-capitalization companies and provides exposure to the Fuel (F), Aerospace & Defense (A), Agriculture (A), Nuclear (N), and Gold & Precious Metals (G) subsectors.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. Performance current to the most recent month-end can be obtained by calling 855-427-7360. Short term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. Performance greater than 1 year is annualized.

Data as of 12/31/23

Growth of \$10,000 Since August 31, 2023

Chart reflects growth of a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. **Past performance is not indicative of future results. Index performance may differ from fund performance. Indexes are not managed, and one cannot invest directly into an index**

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 855-427-7360 or visit our website at www.strivefunds.com. Read the prospectus or summary prospectus carefully before investing.

Important Risks

Investments involve risk. Principal loss is possible. **Oil and Gas Sector Risk.** The profitability of companies in the oil and gas sector is related to worldwide energy prices, exploration costs, and production spending. **Aerospace and Defense Sector Risk.** Aerospace and defense companies can be significantly affected by government aerospace and defense regulation and spending policies because companies involved in this industry rely to a significant extent on U.S. (and other) government demand for their products and services. **Nuclear Energy Sector Risk.** The Fund will be sensitive to, and its performance will depend to a greater extent on, the overall condition of nuclear energy companies. **Agriculture Sector Risk.** Economic forces, including forces affecting agricultural markets, as well as government policies and regulations affecting agriculture companies, could adversely impact the Fund's investments. Agricultural and livestock production and trade flows are significantly affected by government policies and regulations. **Gold and Precious Metals Risk.** The Fund will be sensitive to changes in the overall condition of the gold, precious metals and mining sector. **Foreign Investment Risk.** Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Investments in or exposures to foreign securities are subject to special risks, including risks associated with foreign securities generally, such as differences in information available about issuers of securities and investor protection standards applicable in other jurisdictions; capital controls risks, including the risk of a foreign jurisdiction imposing restrictions on the ability to repatriate or transfer currency or other assets; currency risks; political, diplomatic and economic risks; regulatory risks; and foreign market and trading risks, including the costs of trading and risks of settlement in foreign jurisdictions. **Non-Diversification Risk.** Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund, which may result in greater fluctuation in the value of the Fund's Shares and greater risk of loss. **Index Calculation Risk.** The Index relies on various sources of information to assess the criteria of issuers included in the Index, including fundamental information that may be based on assumptions and estimates. Neither the Fund, the Adviser, the Sub-Adviser nor the Index Provider can offer assurances that the Index's calculation methodology or sources of information will provide a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index. **New Fund Risk.** The Fund is a recently organized management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size. **Concentration Risk.** In following its methodology, the Index will be concentrated to a significant degree in securities of issuers located in the Fuel, Aerospace, Agriculture and Gold sectors. By concentrating its investments in the Fuel, Aerospace, Agriculture and Gold sectors, the Fund may face more risks than if it were diversified broadly over numerous industries or groups of industries. **Geopolitical/Natural Disaster Risks.** The Fund's investments are subject to geopolitical and natural disaster risks, such as war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises and related geopolitical events, as well as environmental disasters, epidemics and/or pandemics, which may add to instability in world economies and volatility in markets. The impact may be short-term or may last for extended periods.

The Strive ETFs are distributed by Quasar Distributors, LLC.

Glossary:

Bloomberg FAANG 2.0 Select Total Return Index: tracks the performance of companies that are engaged in national and natural resource security. Companies must have their primary business activities involved in Fuel (F), Aerospace & Defense (A), Agriculture (A), Nuclear and Renewable Energy (N), and Gold and Other Base & Precious Metals (G).

Market Price: The current price at which shares are bought and sold. Market returns are based upon the last trade price.

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.
